Business Profile: **Ramle Wheels Trading**

Category: **Retail & E-Commerce**

Business Name & Logo

Mission

We provide honest deals on repo and second-hand cars while offering quality repair and restoration services to keep our customer moving with trust and confidence.

Vision

To be the most trusted car dealership, providing quality vehicles and reliable services that keep our community moving with confidence.

Core Services and Product

Car Sales

- Repo cars
- Second-hand cars

Car Repair & Maintenance

- General mechanical repairs
- Engine and transmission servicing
- Electrical system diagnostics
- Preventive maintenance

Car Restoration

- Body repair and repainting
- Interior restoration
- Refurbishment of classic and used cars

Paperwork Assistance

- Ownership transfer support
- Registration renewal (LTO assistance)
- Car document archiving

Customer Support

- Friendly consultations on car purchases
- Vehicle history transparency
- After-sales service and follow-up

Current Challenges

1. **Manual Record-Keeping**
   Vehicle sales, repairs, and customer details are tracked on paper or scattered files, making it hard to retrieve information quickly.

2. **Inventory Tracking Issues**
   No centralized system to monitor available repo and second-hand cars, spare parts, and restoration progress — leading to errors and delays.

3. **Document Management Problems**
   Car papers (OR/CR, insurance, contracts) are stored manually, risking loss, misplacement, or slow processing for customers.

4. **Sales & Customer Monitoring Gaps**
   Lack of proper tracking for customer leads, follow-ups, and sales performance results in missed opportunities and weak after-sales support.

5. **Repair & Service Coordination**
   Work orders and mechanic schedules are managed informally, leading to inefficiencies in repair and restoration services.

6. **Limited Customer Transparency**
   Customers often wait longer for updates on paperwork, car availability, or service status because there is no real-time system for communication.

7. **Growth Limitations**
   As operations expand, manual processes slow down efficiency, making it harder to scale while maintaining quality service.

Target Customer

- Individuals and families looking for affordable, reliable second-hand or repossessed cars.
- First-time car owners who can’t afford brand-new units but want quality and value.
- Vehicle owners who need mechanical repairs, body restoration, or maintenance services.
- Customers who want to extend the life and performance of their existing vehicles.
- Customers seeking flexible payment options for repossessed or second-hand cars.
- Buyers who prioritize paperwork assistance (ownership transfer, registration, insurance).
- Residents of Negros and nearby areas needing everyday transport solutions.
- Small business owners requiring affordable vehicles for deliveries or transport services.

Organizational structure

1. Owner / CEO
   - Oversees the entire business, sets vision, approves major decisions.
2. General Manager
   - Manages day-to-day operations across all departments.
   - Reports directly to the Owner/CEO.
3. Departments

- Sales & Marketing Department
  - Sales Manager – Leads sales team, ensures sales targets are met.
- Service & Repair Department
  - Service Manager / Head Mechanic – Supervises repair and restoration work.
  - Mechanics & Technicians – Handle car repairs, diagnostics, and restoration.
  - Detailing Staff – Handle car cleaning, polishing, and basic cosmetic work.

- Inventory & Documentation Department
  - Inventory Officer – Manages vehicle listings, spare parts, and accessories.
  - Documentation Officer – Handles car papers (LTO registration, transfer of ownership, insurance).
- Finance & Administration Department
  - Accountant / Bookkeeper – Manages finances, payments, payroll, and records.
  - Cashier – Handles day-to-day transactions.
  - Admin Staff – Provides clerical and operational support.
- Customer Support Department
  - Customer Relations Officer – Assists customers with after-sales service, complaints, and inquiries.

4. Support Staff
   - Driver / Utility Staff – For transporting vehicles and general support.
   - Security & Maintenance – Ensures safety and upkeep of premises.
